## Details

---

### Description

This Latvian company provides the following services:

- develops and involves in various architecture and design projects;
- designs engineer networks;
- develops territorial planning;
- develops land survey projects;
- consultations relating to real estate activities.

The company provides all the necessary project development stages starting from project concept and project management and ending with project supervision of all the developed project sections.

Territorial planning includes the development and design of:

- spatial plans;
- local layouts;
- planning of land use;
- thematic planning, etc.

The land surveying services include land marking, measurements for construction site and utilities (gas pipelines, water runs, sewerage, electricity, communication cables, etc.) and others.

Among the company's clients are national and municipal authorities, companies and individuals.

So far the company has concentrated on the provision of its services on the local market but

now is looking for its business expansion with the help of subcontracting and offering partners joint participation in architectural projects in Latvia.

## Advantages and Innovations

The company employees are architects and engineers with 20 and more years of experience in the related field.

The company can offer joint participation in procurements in Latvia and involve in Latvian architectural projects

## Stage of Development
